# SAFETY DATA SHEET

1. Identification

**Product identifier Gallium Citrate Ga 67 Injection** 

Other means of identification

SDS number GA67I

Gallium 67 \* Gallium Citrate Ga 67 **Synonyms** 

Recommended use The content of this kit as sold is radioactive.

It is used as a diagnostic radiopharmaceutical.

Gallium Citrate Ga 67 Injection may be useful to demonstrate the presence and extent of Hodgkin's disease, lymphoma, and bronchogenic carcinoma, Gallium Citrate Ga 67 Injection may

be useful as an aid in detecting some acute inflammatory lesions.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Supplier

Curium Canada Inc. Company name

**Address** 2572 Daniel-Johnson Boulevard

> Offices 245-249, 2nd Floor Laval, QC H7T 2R3

Canada

Customer Service phone number: 866-885-5988 Telephone number

E-mail NuclearMedicine@curiumpharma.com 24 Hour Emergency 314-595-3700

**Emergency telephone** 

number:

Chemtrec 800-424-9300

2. Hazard identification

Physical hazards Not classified.

**Health hazards** Reproductive toxicity Effects on or via lactation

Label elements

Hazard symbol None. None. Signal word

**Hazard statement** May cause harm to breast-fed children.

**Precautionary statement** 

Obtain special instructions before use. Do not breathe mist/vapours. Do not eat, drink or smoke Prevention

when using this product. Avoid contact during pregnancy and while nursing. Wash thoroughly

after handling

IF exposed or concerned: Get medical advice/attention. Response

Store away from incompatible materials. Storage

**Disposal** Dispose of contents/container in accordance with local/regional/national/international regulations.

Other hazards None known.

Supplemental information CAUTION! RADIOACTIVE MATERIAL. Read Package Insert prior to use. Promptly remove any

> contamination from the skin, eyes, or clothing. Radioactive drugs must be handled by qualified personnel in conformity with regulations appropriate to the government agency authorized to license the use of this radionuclide. The vial containing the drug should be kept within its container or within heavier shielding. Avoid contact with the radioactive contents which would

cause unnecessary exposure to radiation.

# 3. Composition/information on ingredients

**Mixtures** 

Gallium Citrate Ga 67 Injection SDS Canada

947254 Version #: 03 Revision date: 04-February-2019 Issue date: 25-January-2019 1/8

Chemical name	Common name and synonyms	CAS number	%
Water		7732-18-5	> 99
Benzyl alcohol		100-51-6	< 1
Sodium chloride		7647-14-5	< 1
SODIUM CITRATE DIHYDRATE		6132-04-3	< 1
Gallium Citrate Ga 67		41183-64-6	< 0.001

#### **Composition comments**

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Gallium Citrate Ga 67 Injection is supplied in a 10 milliliter vial as an isotonic, sterile, non-pyrogenic solution. Each milliliter of the isotonic solution contains 74 megabecquerels (2 millicuries) of Gallium Ga 67 on the calibration date as a complex formed from 8.3 nanograms gallium chloride Ga 67, 1.9 milligrams of sodium citrate dihydrate, 7.8 milligrams of sodium chloride and 0.9 percent benzyl alcohol (v/v) as a preservative. The pH is adjusted to between 5.5 to 8.0 with hydrochloric acid and/or sodium hydroxide solution.

#### 4. First-aid measures

Inhalation Remove to fresh air, support breathing by usual methods if necessary. Stand upwind if possible.

Evaluate and document the amount of material inhaled and seek medical attention for radiation

intake.

Wash off with soap and water. Always blot dry. Do not abrade skin. Notify radiation safety Skin contact

personnel.

Immediately flush eyes with plenty of water for at least 15 minutes. Notify radiation safety Eve contact

personnel.

Ingestion Notify radiation safety personnel immediately. Rinse mouth. The amount of material ingested

should be assessed and documented.

Most important Direct contact with eyes may cause temporary irritation. Rare occurrences of allergic reactions, symptoms/effects, acute and skin rash and nausea have been reported in association with Gallium Citrate Ga 67 use.

delayed

Indication of immediate medical attention and special treatment needed

**General information** 

Provide general supportive measures and treat symptomatically. Keep victim under observation. Symptoms may be delayed.

IF exposed or concerned: Get medical advice/attention. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

## 5. Fire-fighting measures

Suitable extinguishing media Unsuitable extinguishing media

Use fire-extinguishing media appropriate for surrounding materials.

None known.

Specific hazards arising from the chemical

Radioactive. During fire, gases hazardous to health may be formed such as: Radioactive gallium. Radioactive breakdown products. Carbon oxides. Hydrogen chloride. In the event of fire and/or explosion, HCl gas can form flammable or explosive mixtures with alcohols or metals.

Special protective equipment and precautions for firefighters As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Fire fighting equipment/instructions Ensure and follow all guidance provided in handling fire involving radioactive materials. Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers. In case of fire and/or explosion do not breathe fumes.

2/8

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials. General fire hazards No unusual fire or explosion hazards noted.

Gallium Citrate Ga 67 Injection SDS Canada Issue date: 25-January-2019

947254 Version #: 03 Revision date: 04-February-2019

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Follow all guidances provided by NRC or equivalent authority. In the case of a leak/release of this material, wear protective clothing, a personal respirator, chemical-resistant rubber gloves, chemical safety goggles, and shoe covers. If on site, follow the site licence requirements for the disposal of radioactive material or proceed as directed by the local Radiation Safety Officer. Ventilate the area, allowing sufficient time for several air exchanges. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up

Stop the flow of material, if this is without risk. If possible, place material in a suitable hermetically sealed lead container. Following product recovery, flush area with water. For waste disposal, see section 13 of the SDS.

**Environmental precautions** 

Avoid discharge into drains, water courses or onto the ground.

#### 7. Handling and storage

Precautions for safe handling

Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Follow all guidances provided by the US Nuclear Regulatory Commission in the US or equivalent authority in your country and your radiation safety personnel. Maintain radioactive exposures as low as reasonably achievable. Handling time should be kept to a minimum and appropriate radiation shielding should be used. Avoid direct handling by using remote manipulation tools, syringe shields and tongs. Provide adequate ventilation. Do not breathe mist or vapour. Do not get in eyes, on skin, or on clothing. Avoid contact during pregnancy/while nursing. Avoid prolonged exposure. When using, do not eat, drink or smoke. Should be handled in closed systems, if possible. Wear protective clothing, including chemical safety goggles and chemical-resistant waterproof gloves. Wash hands and forearms after handling. Wash hands thoroughly after handling. Observe good industrial hygiene practices.

All shippers and consignees, as well as handlers of this material must possess a valid radioisotope licence issued by the appropriate federal or state authority.

Conditions for safe storage, including any incompatibilities

Store at controlled room temperature at 20–25 °C (68-77°F). Store locked up. Store in original tightly closed container. Store away from incompatible materials (see section 10 of the SDS).

Storage and disposal of product should be controlled in a manner which is in compliance with the appropriate regulations of the federal or state government agency authorized to license the use of this radionuclide.

#### 8. Exposure controls/personal protection

Occupational exposure limits

No exposure limits noted for ingredient(s).

**Biological limit values** 

No biological exposure limits noted for the ingredient(s).

**Exposure guidelines** 

The specific gamma ray constant for Gallium Ga 67 is 1.6 R/mCi-hour at 1 cm.

Appropriate engineering

controls

Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

#### Individual protection measures, such as personal protective equipment

**Eye/face protection** If contact is likely, safety glasses with side shields are recommended.

Skin protection

**Hand protection** Chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

Other Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

**Respiratory protection**No personal respiratory protective equipment normally required. **Thermal hazards**Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Follow all guidances provided by the US Nuclear Regulatory Commission or equivalent authority and your radiation safety personnel. When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

# 9. Physical and chemical properties

**Appearance** Clear, colorless liquid in a 10 mL glass vial.

Physical state Liquid.
Form Liquid.
Colour Colourless.

78.26 hours (Radioactive) Half-Life

Oxidising properties Not oxidising.

Radioactivity 3, 6 or 12 mCi/vial on the calibration date and time.

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions. Gallium Ga 67 with a physical half-life of 78.26 hours1

decays by electron capture to stable Zinc Zn 67. The specific gamma ray constant for Gallium Ga

67 is 1.6 R/mCi-hour at 1 cm.

Possibility of hazardous

reactions

Will not occur.

Conditions to avoid Contact with incompatible materials.

Incompatible materials Strong oxidising agents.

Hazardous decomposition

products

May emit radioactive fumes containing Ga 67 when heated to decomposition.

## 11. Toxicological information

#### Information on likely routes of exposure

Inhalation Exposure to radioactive materials may produce adverse effects. Gallium Citrate does not easily

become airborne.

Skin contact Exposure to radioactive materials may produce adverse effects. May be irritating to the skin. Eye contact

Direct contact with eyes may cause temporary irritation. Exposure to radioactive materials may

produce adverse effects.

Gallium Citrate Ga 67 Injection SDS Canada

# Ingestion

Exposure to radioactive materials may produce adverse effects. May cause asymptomatic physiological uptake by thyroid gland or other tissues.

Symptoms related to the physical, chemical and toxicological characteristics

Direct contact with eyes may cause temporary irritation. Rare occurrences of allergic reactions, skin rash and nausea have been reported in association with Gallium Citrate Ga 67 use.

Acute toxicity	May cause asymptomatic physiological	l uptake by thyroid gland or other tissues.		
Components	Species	Test Results		
Benzyl alcohol (CAS 100-51-6)	•			
Acute				
Dermal				
LD50	Guinea pig	<= 5 ml/kg		
	Rabbit	2000 mg/kg		
Inhalation				
LC100	Rat	200 - 300 mg/l, 8 Hours		
LC50	Rat	1000 mg/l, 8 Hours

	Rabbit	1940 mg/kg		
	Rat	1230 - 3100 mg/kg		
Other				
LD50	Guinea pig	>= 400 mg/kg		
	Mouse	324 mg/kg		
		<= 0.5 ml/kg		
	Rat	53 mg/kg		
Sodium chloride (CAS 7647-14-5)		3 3		
Acute	,			
Oral				
LD50	Mouse	4000 mg/kg		
	Rat	3000 mg/kg		
Other				
LD50	Mouse	2602 mg/kg		
Skin corrosion/irritation	May cause skin irritation.			
Serious eye damage/eye irritation	Direct contact with eyes may cause temporary irritation.			
Respiratory or skin sensitisatio	n			
Respiratory sensitisation	Rare occurrences of allergic reactions, skin rash and nausea have been reported in association with Gallium Citrate Ga 67 use.			
Skin sensitisation	Rare occurrences of allergic reactions, skin rash and nausea have been reported in association with Gallium Citrate Ga 67 use.			
Germ cell mutagenicity	No long-term animal studies have been performed to evaluate carcinogenic or mutagenic potential or whether this drug affects fertility in males or females. Gamma radiation is a potential mutagen to human. The health risks associated with chronic radiation exposure (cancer, leukaemia, genetic and teratogenic effects) are believed to involve levels of radiation exposure which are much higher than those permitted occupationally.			
Carcinogenicity	No long-term animal studies have been performed to evaluate carcinogenic or mutagenic potential or whether this drug affects fertility in males or females. Gamma radiation is carcinogenic to humans. The health risks associated with chronic radiation exposure (cancer, laukangia and terretoppia effects) are helicited to involve levels of radiation exposure.			

Gallium Citrate Ga 67 Injection SDS Canada

leukaemia, genetic and teratogenic effects) are believed to involve levels of radiation exposure which are much higher than those permitted occupationally. Risk of cancer cannot be excluded

with prolonged exposure.

Reproductive toxicity

No long-term animal studies have been performed to evaluate carcinogenic or mutagenic potential or whether this drug affects fertility in males or females. This drug is known to be excreted in human milk during lactation, therefore, formula feedings should be substituted for breast feedings. Animal reproductive studies have not been conducted with Gallium Citrate Ga 67. It is also not known whether Gallium Citrate Ga 67 can cause fetal harm when administered to a pregnant woman or can affect reproduction capacity. Gallium Citrate Ga 67 should be given to a pregnant woman only if clearly needed. Ideally, examinations using radiopharmaceuticals, especially those elective in nature of women of childbearing capability, should be performed during the first few (approximately ten) days following the onset of menses.

Specific target organ toxicity -

single exposure

Not classified.

Specific target organ toxicity -

Not classified.

repeated exposure

Due to partial or complete lack of data the classification is not possible.

**Aspiration hazard Chronic effects** 

The health risks associated with chronic radiation exposure (cancer, leukaemia, genetic and teratogenic effects) are believed to involve levels of radiation exposure which are much higher

than those permitted occupationally.

**Further information** 

No long-term animal studies have been performed to evaluate carcinogenic or mutagenic

potential or whether this drug affects fertility in males or females.

# 12. Ecological information

**Ecotoxicity** There are no data on the ecotoxicity of this product.

Components **Species Test Results** Benzyl alcohol (CAS 100-51-6) Aquatic Fish LC50 Bluegill (Lepomis macrochirus) 10 mg/l, 96 hours Sodium chloride (CAS 7647-14-5) Aquatic Crustacea EC50 Water flea (Daphnia magna) 340.7 - 469.2 mg/l, 48 hours LC50 Fish Fathead minnow (Pimephales promelas) 6020 - 7070 mg/l, 96 hours SODIUM CITRATE DIHYDRATE (CAS 6132-04-3) Aquatic

EC50 Crustacea Water flea (Ceriodaphnia dubia) 655 - 825.9 mg/l, 48 hours

No data is available on the degradability of any ingredients in the mixture.

Bioaccumulative potential

Partition coefficient n-octanol / water (log Kow)

Benzyl alcohol (CAS 100-51-6) 1.1

No data available. Mobility in soil Other adverse effects None known.

# 13. Disposal considerations

Gallium Citrate Ga 67 Injection is Radioactive Waste until the activity has decayed to **Disposal instructions** 

non-detectable levels. Radioactive waste must be handled in accordance with procedures established by your Radiation Safety Officer, NRC and other applicable regulations. If medical waste is involved, such as blood, blood products, or sharps, the waste must be handled as a biohazard and disposed of accordingly. If not a biohazard, consult local, state and federal

regulations for proper disposal.

Local disposal regulations

Dispose in accordance with all applicable regulations.

Hazardous waste code

The waste code should be assigned in discussion between the user, the producer and the waste

disposal company.

Waste from residues / unused

products

Dispose of in accordance with local regulations.

Contaminated packaging

Dispose in accordance with all applicable regulations.
