CURIUM'S CO2 EMISSIONS REDUCTION TARGETS

E1. Carbon footprint reduction (Scope 1&2) targets:

- ✓ Achieving **at least a 20% reduction in Curium's carbon footprint by 2026, from a 2023 baseline.**
- ✓ Achieving **at least a 30 % reduction in Curium's carbon footprint by 2027, from a 2023 baseline.**
- ✓ **Reducing or maintaining at least the 2023 carbon footprint intensity :**
 - scope 1&2/revenue = 40 kgCO2eq/k€ of revenue
 - scope 1&2/employee = 14tCO2eq/employee

DECARBONIZATION PLAN

E1. Carbon footprint reduction (Scope 1&2)

YEAR	KEY ACTIONS to reach the targets	Impact of key actions on 2023 Group carbon footprint decrease (based on 2024 consumption)
2025	Petten green electricity contract	-4.6 %
2025- 2026	MH green electricity contract	-17.8 %
2026	2 green electricity contracts	-22.4%
2026	NB green electricity contract	-10.8%
2027	Petten, MH, NB green electricity	-33 %

Decarbonization action plan to reach at least 20% reduction in 2026

Switch to green electricity contracts for 2 main sites, Petten and MH

Decarbonization action plan to reach at least 30 % reduction in 2027

Switch to green electricity contracts for 3 main sites, Petten, MH and NB

E1. Carbon footprint intensity reduction (Scope 1&2)

✓ In 2024, -6% in carbon footprint intensity compared to 2023 :

KPI	Group 2024	Group 2023	% progression 2023-2024
scope 1&2LB/revenue (kgCO2eq/k€)	37.3	40	-6%
scope 1&2LB/employee (tCO2eq/employee)	13.2	14	-6%
